

Exciting News for California Residents!

On **January 26, 2026**, the California Public Utilities Commission (CPUC) launched a three-year California LifeLine Home Broadband Pilot, helping make internet more affordable for eligible households across California. The Pilot offers a discount on home broadband with minimum speeds of 100/20 Mbps* and 1,280 GB of data per month.

What Discount Can I Receive?

Eligible households may choose **ONE** CA LifeLine Discount Option:

- Up to \$20/month for standalone broadband service;
- Up to \$30/month for bundled broadband; or
- Up to \$19/month toward CA LifeLine wireline or wireless phone service

Important: California LifeLine allows only one discounted service per eligible household. Households may choose either a Home Broadband Pilot discount or a traditional California LifeLine phone service discount, but not both.

GET STARTED IN 3 EASY STEPS:

STEP 1: Check if You Qualify- You may qualify if you participate in programs like Medicaid or SNAP, or meet California LifeLine income eligibility guidelines. Visit www.californialifeline.com for details.

STEP 2: Find a Provider- Visit californialifeline.com, click on Provider Search, and enter your ZIP Code to find available providers.

STEP 3: Contact a Service Provider- Call a provider in your area and tell them you are applying for the California LifeLine Home Broadband Pilot. They will help you enroll.

DON'T MISS OUT! AFFORDABLE, HIGH-SPEED INTERNET CAN HELP YOU STAY CONNECTED, ACCESS HEALTHCARE, EDUCATION, OR WORK FROM HOME

** Standalone broadband plan does not include voice service for making 911 calls. Customers may be de-enrolled from the program due to non-usage. Only one service is allowed per household, except for TTY users who may receive a discount on a second phone line. (GO 153-A). Wireless service may experience interruptions due to weather conditions, terrain, or gaps in service coverage. (D.12-12-038) Exemptions may be applied in locations where the 100/20 Mbps speed is not available. Some income-eligible, low-cost broadband plans may not meet the 100/20 Mbps.
