- SMS

Completed Projects in July

- Moved Lexis-Nexis check up front

Program Process Changes

- None to report

Carrier Activities in Progress

- Frontier rate group correction
- AT&T billing address update
- Blue Jay Wireless to Global Connection Inc. migration

Revised Signature Guidelines

Impact of revised signature guidelines – New guidelines implemented the first week of June 2017 includes both wireline and wireless

Number of Signature Related Final Denials

Signature Guidelines

Step 1 – Is there a signature on the form? If yes, go to step 2. If no, deny the form.

Step 2a – Check to see if the applicant's signature shows a name that is definitely not the applicant's. For example, the applicant's name is Elsa Olaf. However, the signature definitely indicates Prince Hans. Deny the form if the applicant's signature shows a name that is definitely not the applicant's.

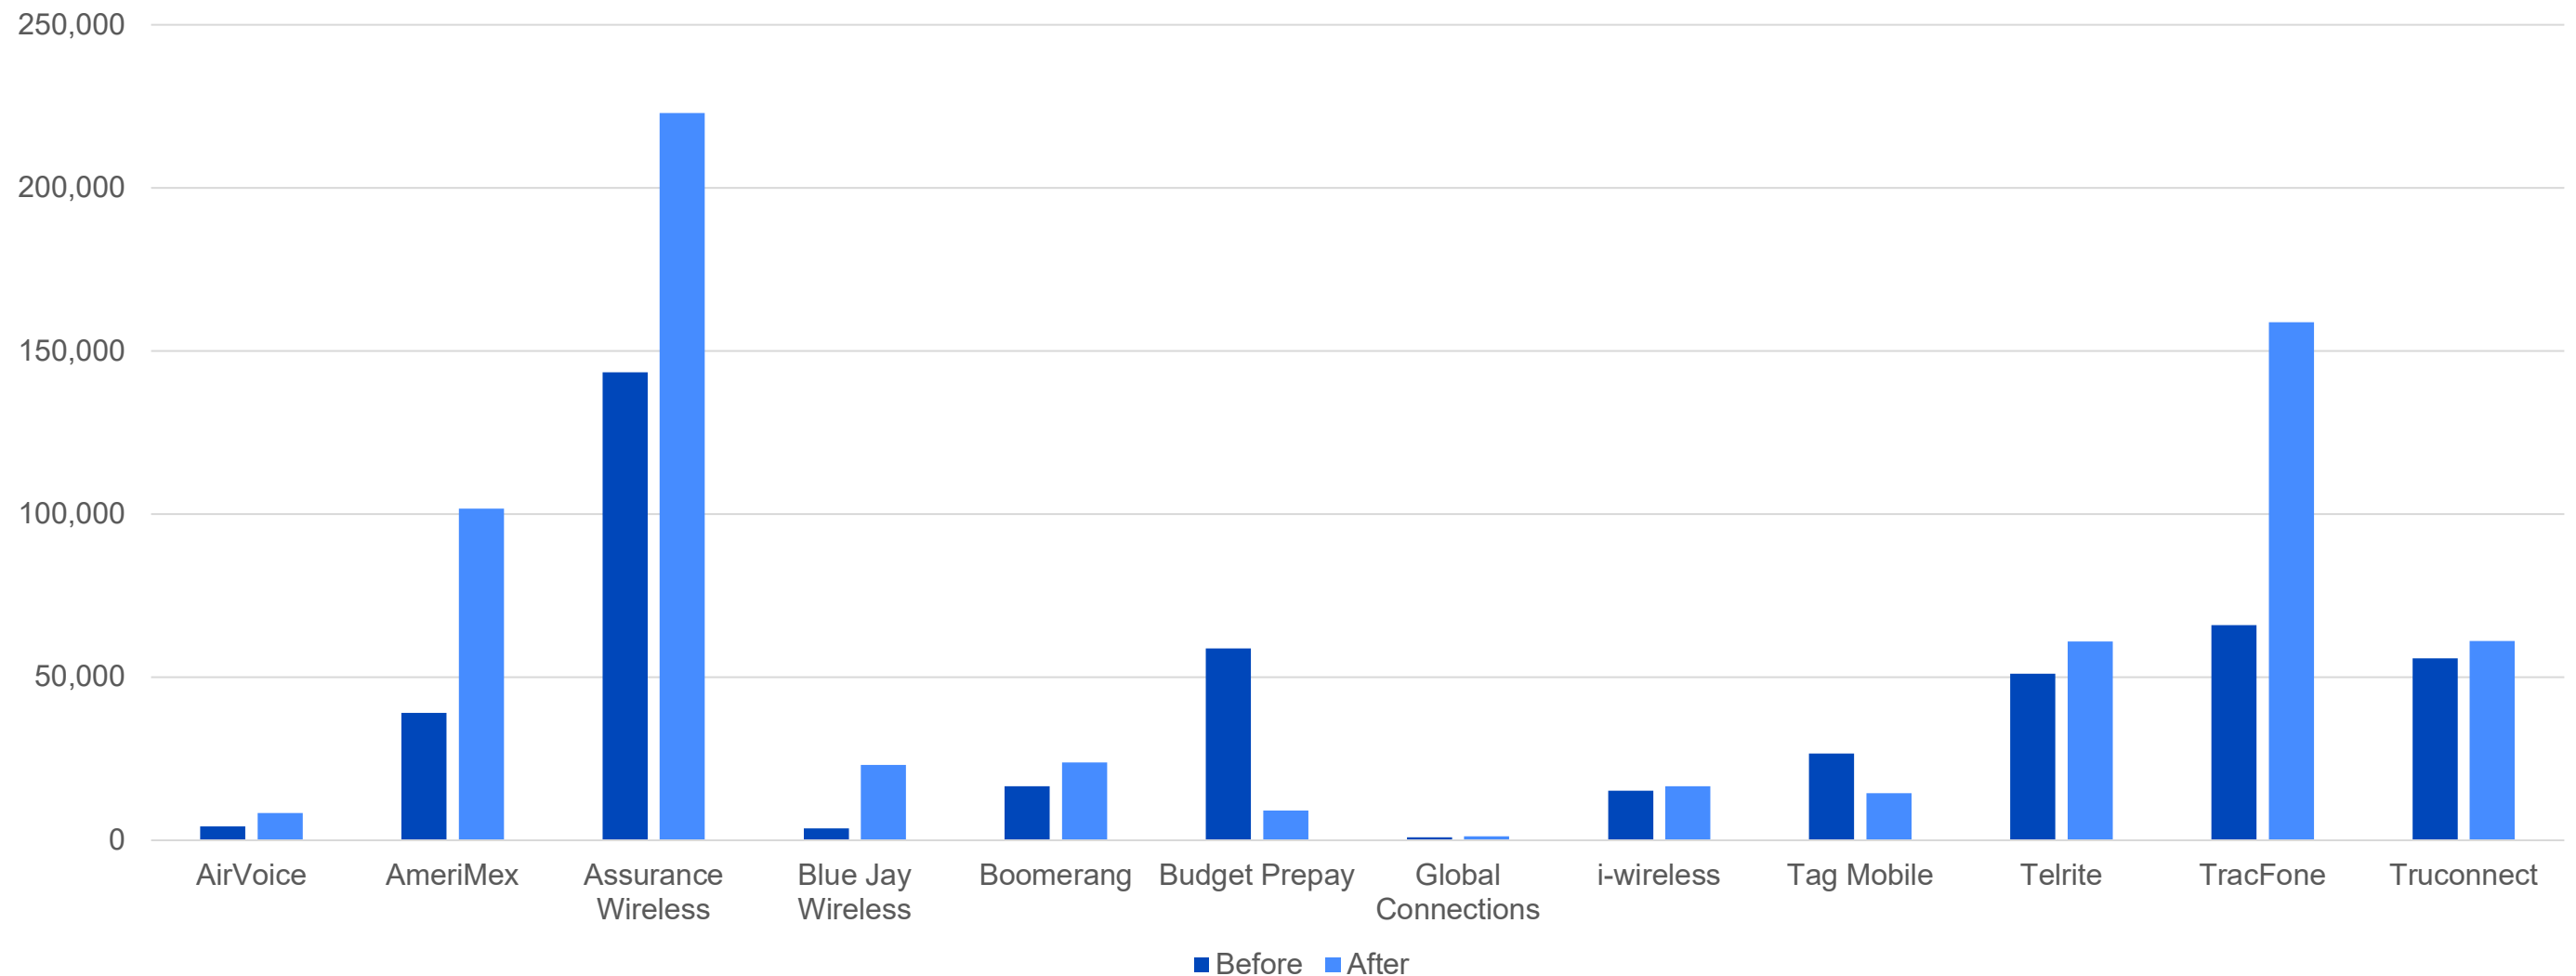

Step 2b – If there is documentation in addition to the form, check to see if the applicant's signature definitely conflicts the applicant's signature on the additional documentation, as applicable. If we have historical documentation that can help in the review, we can use it as a resource. Deny the form if the applicant's signature definitely conflicts with the applicant's signature on the additional documentation.

If, at any time, we suspect that there may be a violation of a program rule, then we can flag the record for additional review.

Disconnect Statistics

Pre-Reform Order Data: 6/1/16 – 11/31/16; Post Reform Order Data: 12/2/16 – 5/31/17

FCC Reform Order 16-38 Disconnect Statistics

Number of disconnects by wireless carrier - Impacts of non-usage change by FCC reform order 16-38 implemented on December 2nd, 2016. Consumers now disconnected after 30 days or non-usage vs. 60 days of non-usage

Non-Returned Forms Statistics

Forms Not Returned Stats for the last 12-months

LifeLine Participation Trends and Projections

Dec-2016 Projection Deviations

- FCC change of 60 day to 30 day non-usage disconnect rule
