**Communications Service Providers’ Resiliency Plans Filed as Advice Letters (2021-23):** In Rulemaking (R.) 18-03-011, the Commission issued two Decisions, (D.) 20-07-011 and (D.) 21-02-029, requiring wireless and wireline communications service providers to file Communications Resiliency Plans (“Resiliency Plans”) via Advice Letter on an annual basis as part of the Emergency Disaster Relief Program. The Commission identified forty-nine (49) facilities-based service providers with facilities located in Tier 2 and 3 High Fire Threat Districts (HFTDs) in 2021, 2022, and 2023, who were required to file Resiliency Plans. All forty-nine (49) service providers were required to file a sum of three (3) Plans; one for each year 2021, 2022, and 2023. Since 2021, when these requirements went into effect, the Commission’s Communications Division (CD) actively pursued service providers’ compliance when providers failed to file Resiliency Plans or did not provide sufficient data in the Plans they filed (“Rejected”). The table above shows these forty-nine (49) services providers’ year-over-year count of Resiliency Plans filed and associated supplemental filings, if any were required. The table also indicates which Resiliency Plans were protested, and whether Resiliency Plans were rejected and/or accepted by CD. CD continues to monitor service providers’ compliance with filing Resiliency Plans on an annual basis as part of the requirements for communications service providers to develop comprehensive network resiliency strategies to prepare for power outages and catastrophic disasters.
