

Wireline Service Providers Communications Resiliency Plans (Aggregated Data 2021-23): Year-over-year (YOY) trend chart of all wireline facilities in Tier 2 and 3 High Fire Threat District (HFTD)* areas. This chart shows the percentage of wireline facilities that are equipped with 72 hours of backup power as reported by wireline service providers in their annual Communications Resiliency Plans filed pursuant to Decision D.21-02-029. The chart indicates that the increase in percentage of wireline facilities with 72 hours of backup power corresponds to the decrease in the number of facilities being reported YOY by wireline service providers. [*Note: Wireline service providers reported 127 facilities in Tier 1 HFTDs.]
