Answer Time: Performance Statement
The current answer time performance for May and June 2022 is slightly below the 80% benchmark due to the extraordinary circumstances surrounding impacts from more frequent than normal severe weather events a federal subsidized service offerings, as well as call center staffing impacts related to the COVID-19 pandemic. That said, the 79% performance level for May represents a 14-second difference from the 80% benchmark. The 77% performance level for June represents an 8-second difference from the 80% benchmark. When considering customer use of interactive voice response (IVR), the percentage of calls answered within 60 seconds for the 80% benchmark. Charter remains responsive to the ongoing demand for service, installations, and telephone service inquiries, including with continued hiring efforts and overtime shifts. Charter anticipates return compliance in the following reporting quarter.
