

IRP Webinar on the Local Capacity Tool

Energy Division staff will host a public webinar to present and discuss a new module for CPUC's RESOLVE capacity expansion model and ask for stakeholders' input. The new RESOLVE tool could allow for analysis of a specific local area to estimate the amounts and types of electricity generation and storage resources that would constitute the cost optimal build within that area, supplementing the larger RESOLVE model's statewide analysis. Slides will be posted online at the [Local Capacity Tool](#) webpage before the webinar.

Objectives of the webinar:

- Introduce and provide an overview of the local tool and its capabilities.
- Highlight proof-of-concept modeling results.
- Discuss potential options for integrating the local tool into IRP processes.
- Ask for stakeholders' written informal feedback on the tool and Staff recommendations for its integration into ongoing IRP processes.

Agenda (subject to change)

- Introduction
- Background & context for model's development
- Overview of local capacity tool
- Proof-of-concept results
- Potential uses for the local tool within IRP
- Next steps
- Questions

Preparation

- Webinar slides will be posted in advance on the [Local Capacity Tool](#) webpage.
- During the workshop, there will be opportunities for stakeholders to ask clarifying questions. However, the comments and questions during this webinar will not be considered as submitted comments and Staff will not record them.
- Stakeholders who want to submit written informal comments will need to submit them following the instructions that will be provided during the webinar.
