

BEAD Challenge Process: Working with Members of the Public to Submit Individual Challenges

How to encourage individual participation in the Challenge Process

Welcome

Laura Sasaki

Program and Project Supervisor

CPUC BEAD Branch

Agenda

1. Welcome
2. BEAD Overview
3. Challenge Process overview
4. Permissible challengers' role in the process
5. Portal access and challenge submission
6. How challengers can engage with individuals
7. Evidence required for individual challenges
8. Takeaways and next steps

Housekeeping

Tips for getting the most out of this webinar

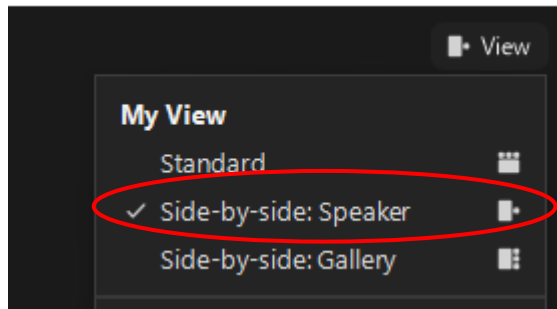

Closed Captions: English closed captions are available. Select “Show captions“ on your toolbar. (Click the small arrow on the ‘Show captions’ button for more settings or to see a full transcript)

Q&A: Please add your questions via the Q&A function and answers will be added to the FAQs on the BEAD Challenge Process webpage.

Select Side-by-Side: Speaker Mode for the best viewing experience when slides are shared

Chat: Keep an eye on the chat because we will use it to send useful links to you.

Who should be involved?

- The target audience for this presentation is **local governments, Tribal governments, and nonprofit organizations who choose to submit challenges on behalf of individuals**. According to federal rules these are the only entities that can submit challenges, alongside broadband service providers
- These groups have specific capabilities and responsibilities in the Challenge Process related to **challenges, rebuttals, and facilitating individuals' participation**
- When preregistering in the Challenge Portal you must select the **option to submit individual challenges**
- Though **broadband service providers** are permissible challengers, they **cannot submit challenges on behalf of individuals**

Why is this important?

- The Challenge Process is the **only opportunity for entities to propose changes** to the FCC National Broadband Map in terms of **locations eligible for BEAD funding**
- BEAD funding is unprecedented; California is allocated **\$1.86 billion** for broadband infrastructure
- Once the final map is approved, **only those areas identified as eligible will receive funding for last-mile infrastructure**
- The ultimate goal is to get **high-speed connectivity to all broadband serviceable locations**

BEAD overview

Joanne Hovis

President

CTC Technology and Energy

BEAD Overview

What is the BEAD Program?

- The **Broadband Equity, Access, and Deployment (BEAD) Program** was created by the **bipartisan Infrastructure Investment and Jobs Act (IIJA)** in 2021
- Allocates **\$42.45 billion of federal funding** to all 50 states, Washington D.C., and territories
- Administered by the **National Telecommunications and Information Administration (NTIA)**
- Goal of **expanding high-speed internet access** through infrastructure deployment

Funding priority

How will BEAD funding be prioritized?

1. **Top priority: Unserved areas** (locations with internet speeds below 25/3 Mbps)
2. **Second priority: Underserved areas** (locations with speeds between 25/3 and 100/20 Mbps)
3. **Third priority: Community anchor institutions** (those with internet service under 1 Gbps symmetric)

The BEAD Program requires the state to deliver service to all unserved and underserved areas.

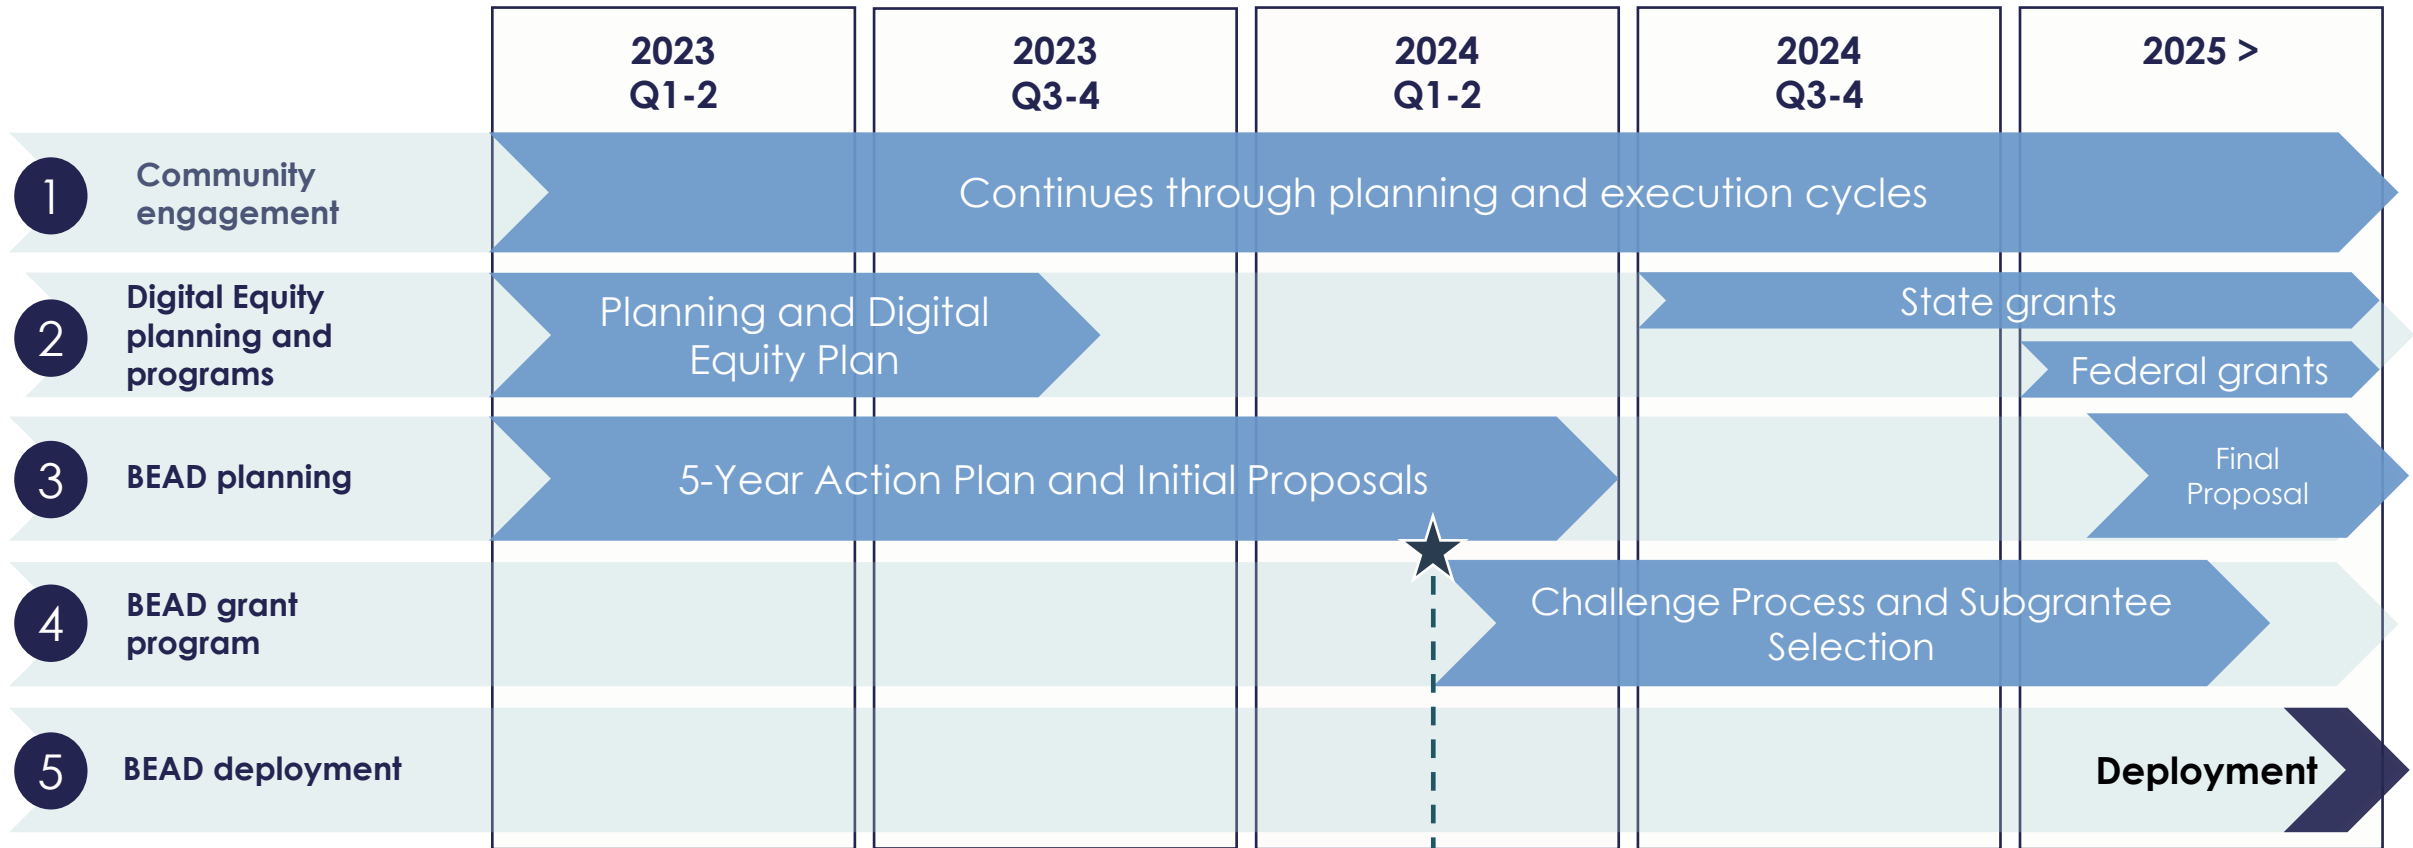

The BEAD Program in California

In June 2023, California was allocated \$1.86 billion in BEAD funds that will become available following completion of the federal planning and approval cycle.

The CPUC has submitted to the federal government the Five-Year Action Plan and Initial Proposal Volumes I & II.

Overall BEAD status and timeline

We are here:
Challenge Process

BEAD Challenge Process overview

Joanne Hovis

President

CTC Technology and Energy

Purpose

What is the BEAD Challenge Process?

- The Challenge Process will determine **locations** and **community anchor institutions** within the state that are **eligible for BEAD funding**
- It must **confirm whether existing data is correct** about which areas **lack adequate internet service**
- Challengers offer input on **whether specific locations are not accurately reported** in the datasets and therefore should be **eligible for BEAD funding**

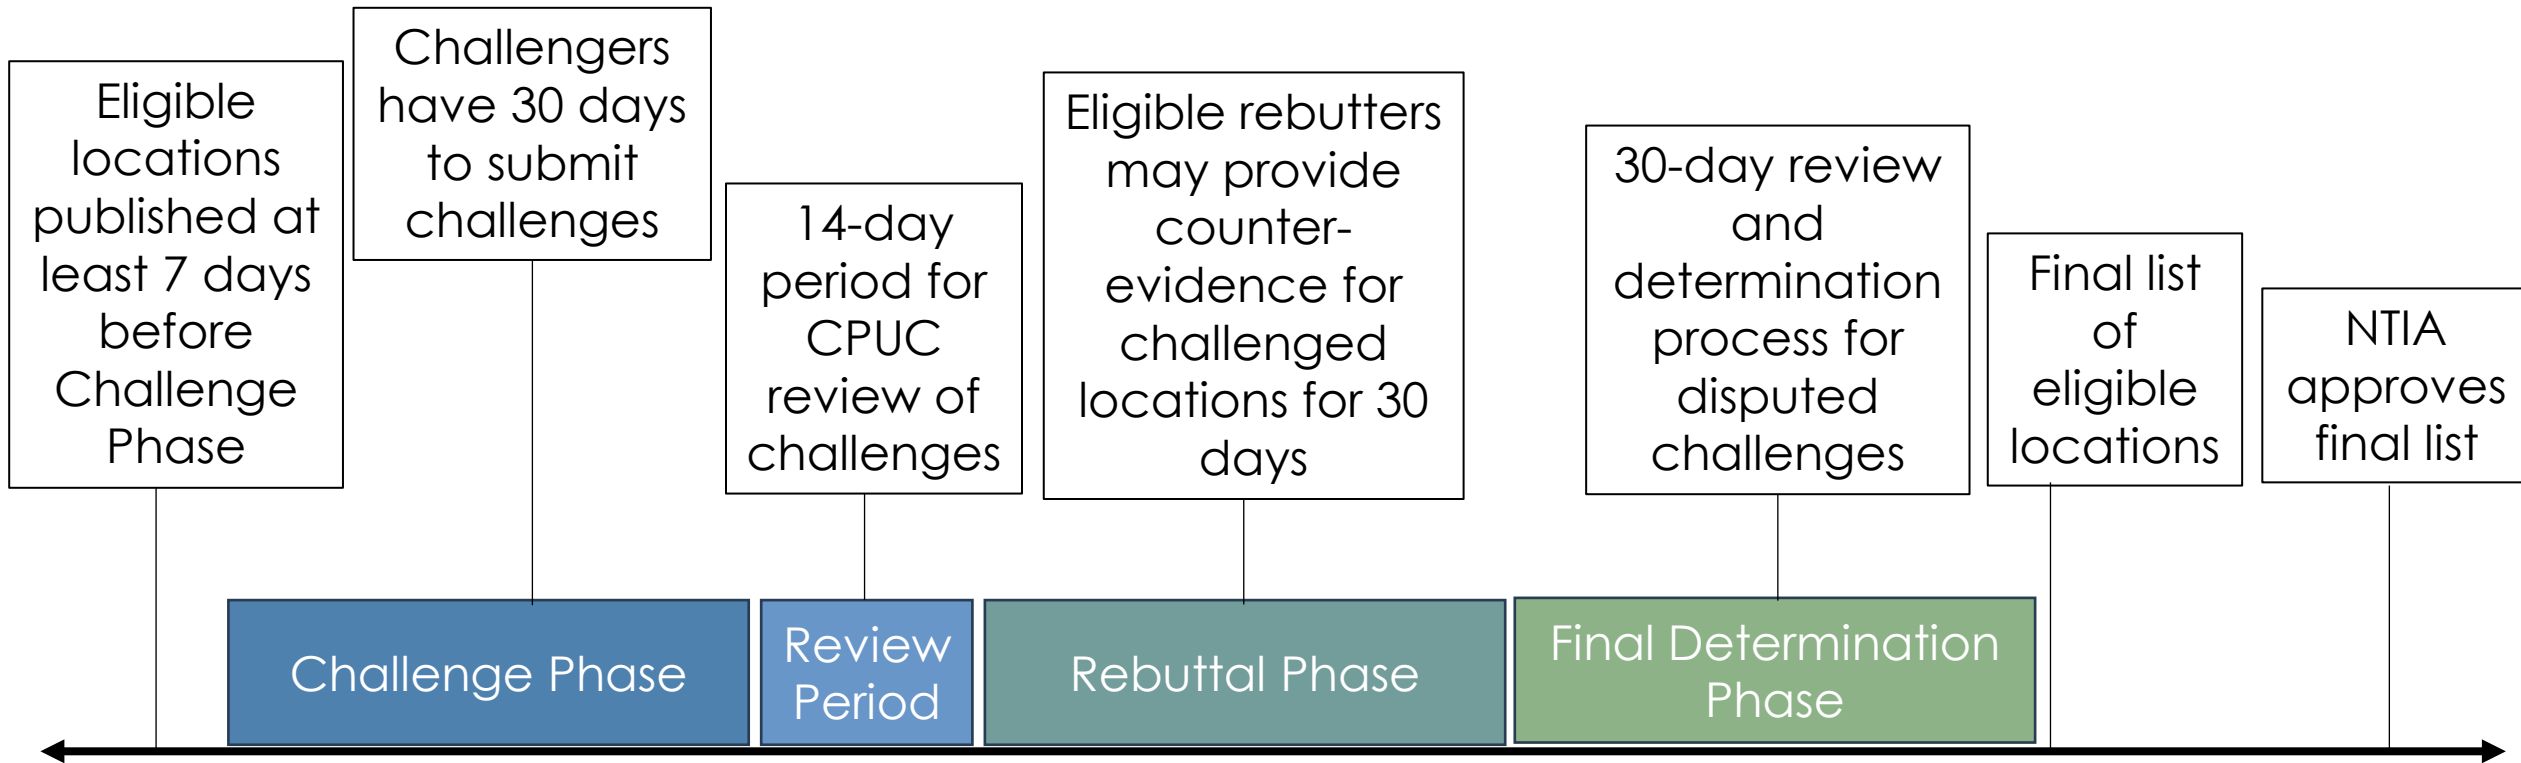

Relevance

Why is the BEAD Challenge Process so important?

- It will **determine eligibility for BEAD funding** (which totals **\$1.86 billion** in California)
- It is the **single best chance** to correct the FCC's Broadband Data Map
- You can **advocate for your community** by providing evidence that it is unserved or underserved
- The improved data will help the BEAD Program and future programs **allocate funding to the areas that need it most**

Timeline of events

Who can submit a challenge?

Local governments

Nonprofit organizations

Tribal governments

Broadband service providers

Can individuals participate?

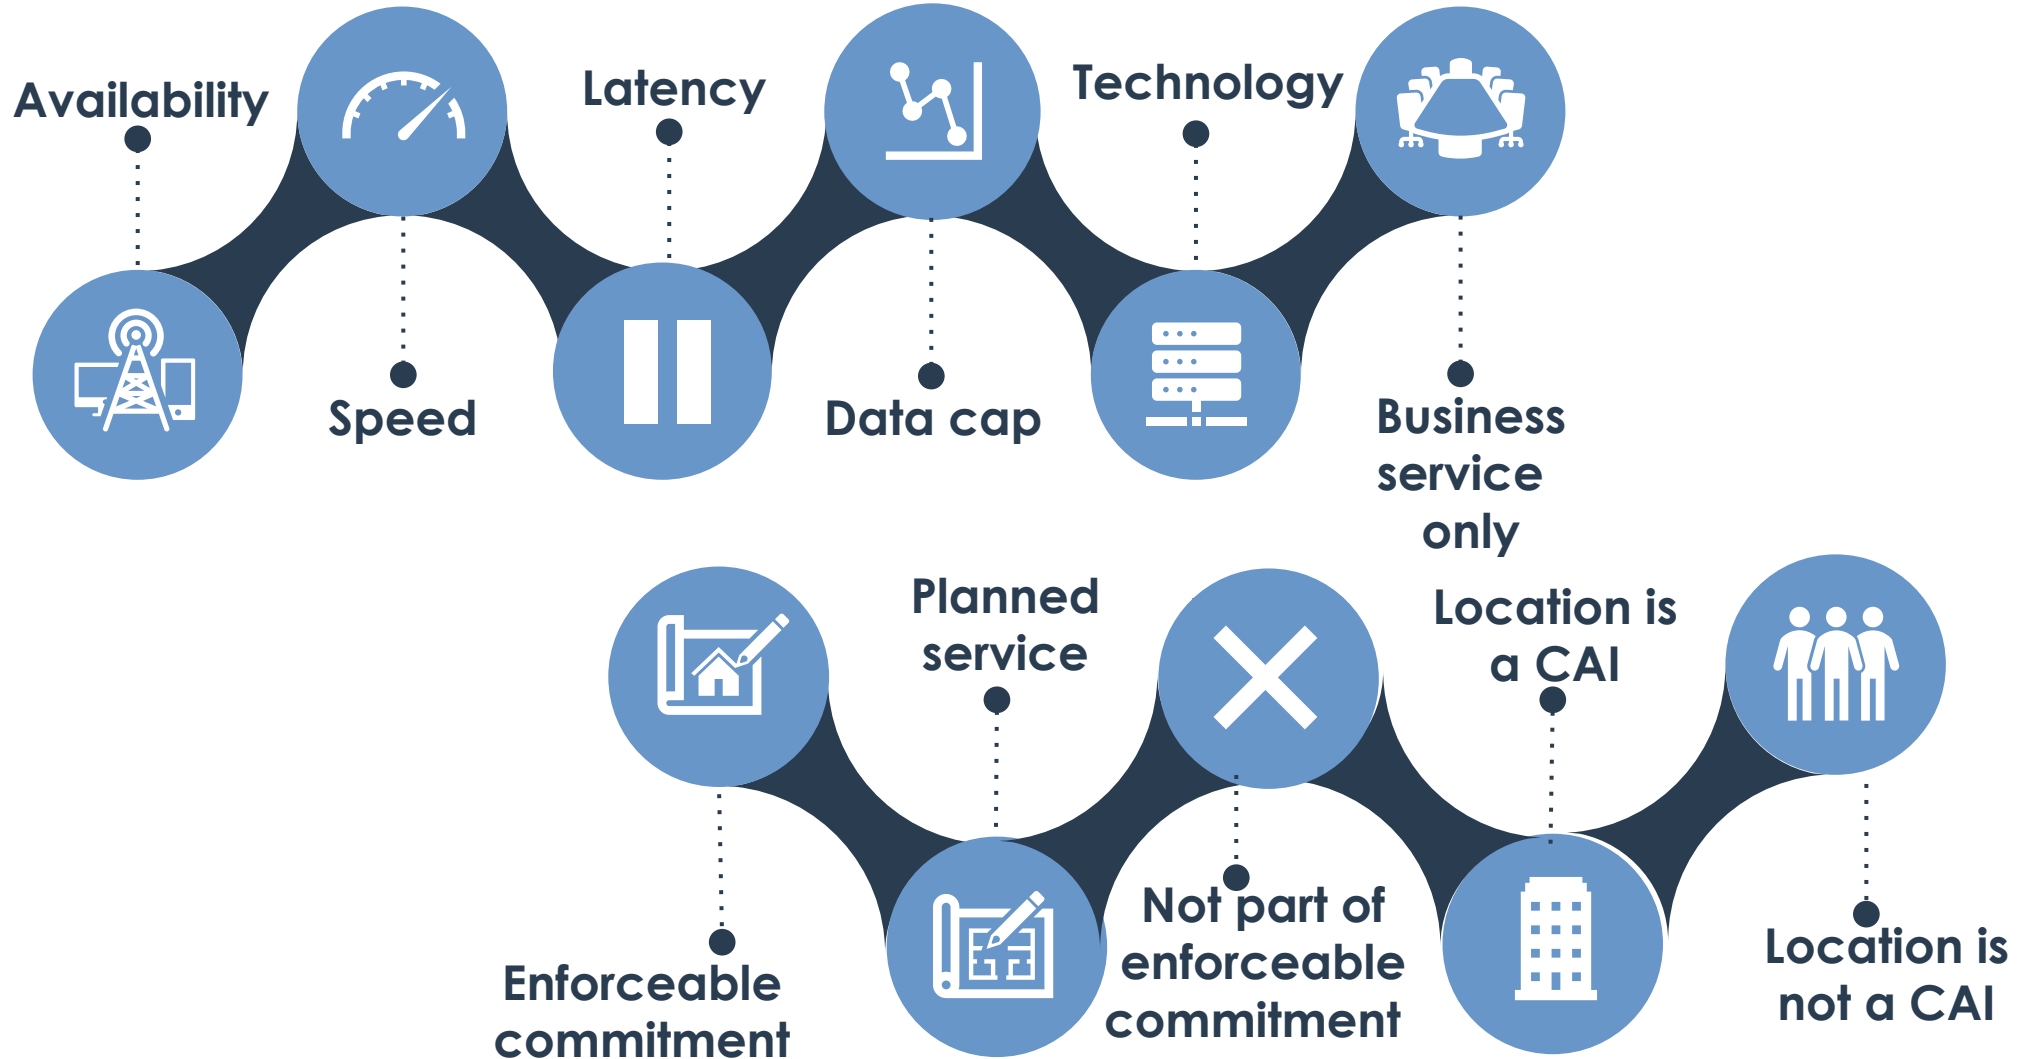

- While NTIA requirements don't allow individuals to submit challenges directly, **they can gather and submit evidence for permissible challengers to submit on their behalf** to the CPUC
- Later in this presentation, we will explain how individuals **can work with and submit evidence** to permissible challengers

What can be challenged?

- **Internet availability** and other specifications (including speed, latency, data caps, and technology)
- **Community anchor institution eligibility** and identification
- **Enforceable commitments**
- **Planned service**

Challenge types

Area and Multi-Dwelling Unit (MDU) challenges

Area and MDU challenges can apply for the following challenge types:

- Availability
- Speed
- Latency
- Data cap
- Technology

- **If enough challenges are submitted** in a particular area or building, **all the locations in that area or MDU become challenged** and the provider must show they are sufficiently served
- **Area challenges** are triggered if **six or more** broadband serviceable locations using a specific technology and reportedly served by a single broadband service provider **within a census block group** are challenged
- **MDU challenges** are triggered if challenges are submitted for one unit for MDUs with less than 15 units, two units for MDUs of between 16 and 24 units, and at least three units for larger MDUs

What is your role in the Challenge Process as a permissible challenger?

Joanne Hovis

President

CTC Technology and Energy

Permissible challengers

According to NTIA's requirements, local governments, Tribal governments, nonprofits, and broadband service providers:

- **Have full access to the Challenge Portal** once registered
- **Can submit challenges** for specific locations using approved evidence types
- **Can rebut challenges**

Some permissible challengers (local governments, Tribal governments, and nonprofits) **can engage individuals** on evidence submission

Most common individual evidence types will be for 'Availability' and 'Speed' challenges

Note: Permissible challengers will benefit from actively engaging during the CPUC's outreach to understand the timeline, acceptable evidence, and the Challenge Portal. Individuals will not be able to register for the Challenge Portal.

Permissible challengers must also register to submit challenges on behalf of individuals

California Public Utilities Commission

English (English)

Home

Welcome to California's BEAD Challenge Portal

Challenge the map to ensure BEAD funding goes where it is most needed and bring affordable, reliable, high-speed broadband across California.

We encourage all Local Governments, Tribal Governments, Nonprofits, and Broadband Service Providers to participate in the Challenge Process!

[Register Now](#)

[Learn More](#) →

Sample challenges

Per NTIA, all permissible challengers can submit all types of challenges

- **Example:** A nonprofit submits a '**Speed**' challenge claiming a specific location that the FCC Map shows as 'served' has speeds of 10/3 Mbps, using approved speed tests as evidence.
- **Example:** A Tribal government submits an '**Availability**' challenge to demonstrate that a location that the FCC Map shows as 'served' is not served by that provider. The Tribal government submits a letter from the provider denying a service request as evidence.

Each type of challenge has its own evidentiary requirements. Please see the [NTIA Policy Notice](#) for more information

Portal Access and challenge submission

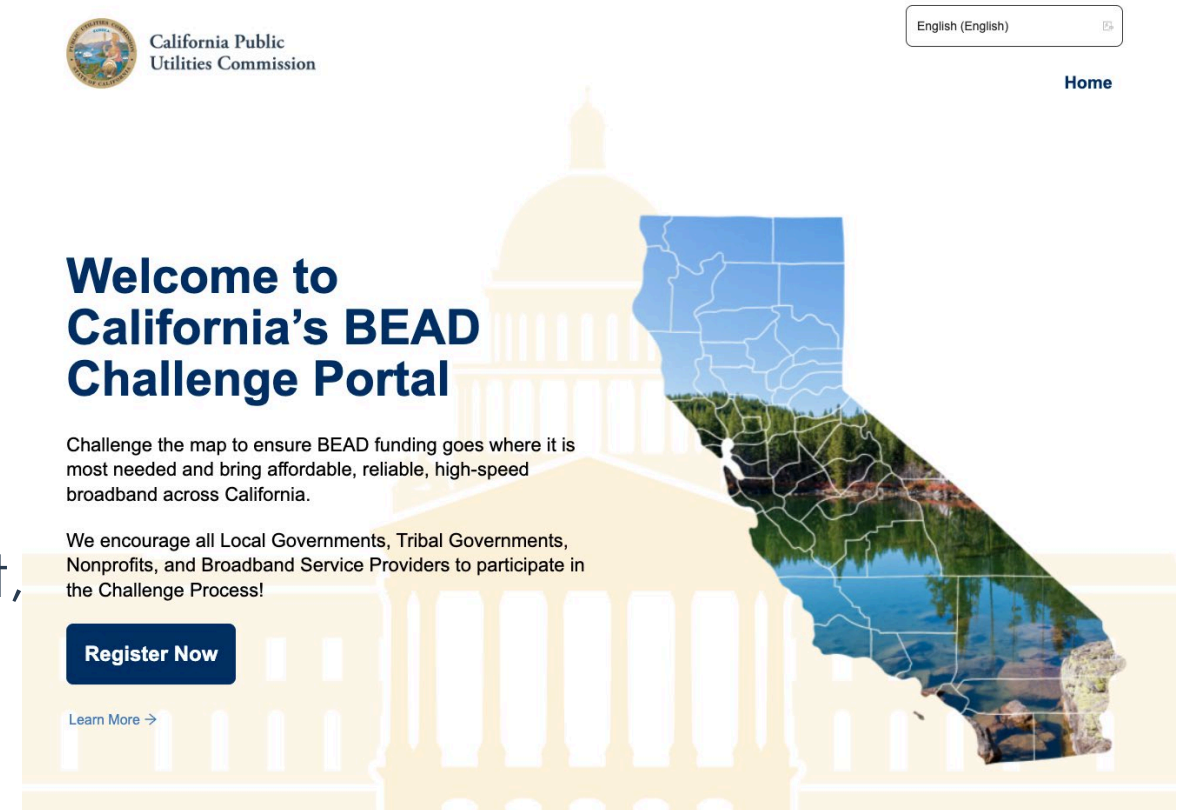

Clayton Wooley

Director of Technical Strategy

Ready.net

Registration for the Challenge Portal for permissible challengers

1. Visit register.challenge.cpuc.ca.gov and select **'Register Now'**
2. Fill out the form of **basic information** about your organization
3. Select to submit challenges and evidence **on individuals' behalf**
4. Fill out information **specific to your organization type** (local government, Tribal government, nonprofit)
5. Select **'Finish'**
6. Receive **approval** and email to **set up account**

The screenshot shows the top of the registration portal. On the left is the California Public Utilities Commission logo. On the right is a language selector dropdown set to 'English (English)' and a 'Home' link. The main heading reads 'Welcome to California's BEAD Challenge Portal'. Below this is a paragraph: 'Challenge the map to ensure BEAD funding goes where it is most needed and bring affordable, reliable, high-speed broadband across California.' Another paragraph follows: 'We encourage all Local Governments, Tribal Governments, Nonprofits, and Broadband Service Providers to participate in the Challenge Process!'. A prominent blue 'Register Now' button is centered, with a 'Learn More ->' link below it. The background features a silhouette of the California State Capitol building and a map of California with a scenic landscape overlay.

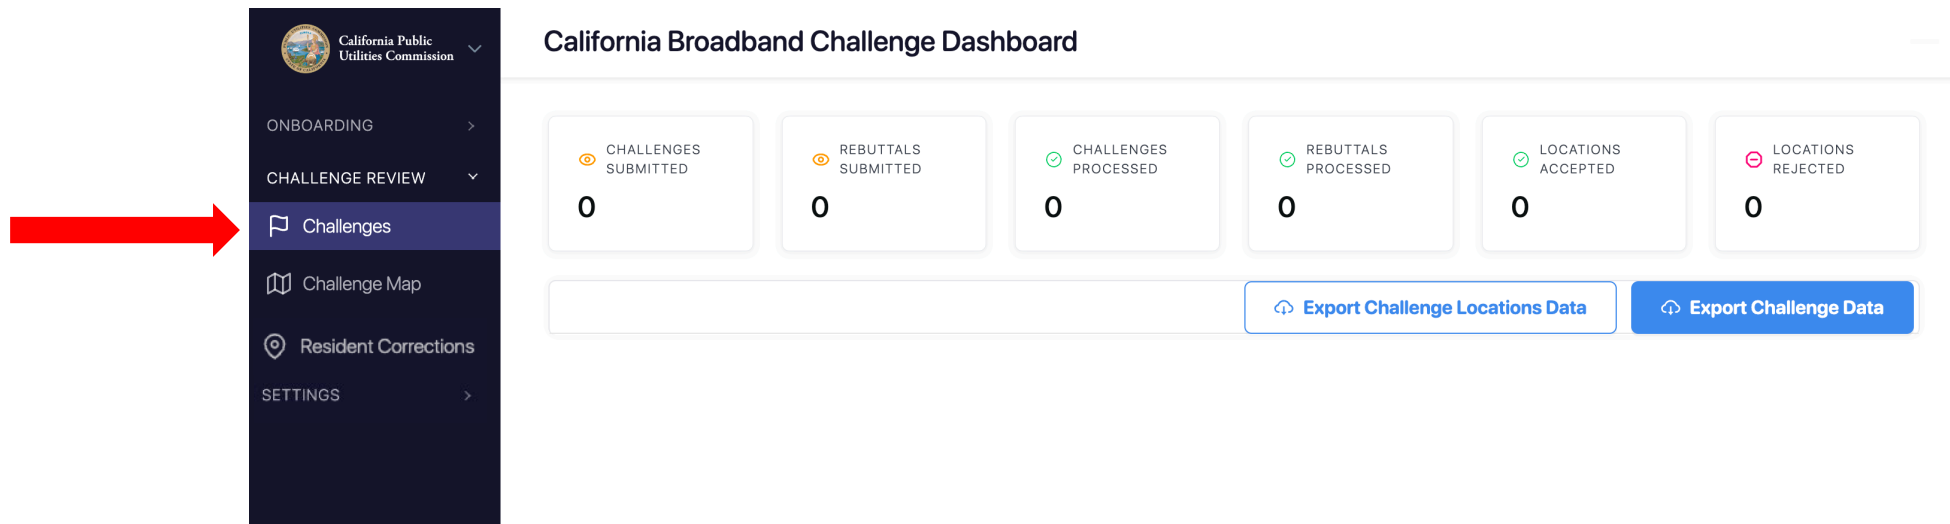

Application for CostQuest Tier E Fabric License

- **Tier E license** is for local governments, Tribal governments, and nonprofits and while not required, is strongly recommended.
- The Challenge Portal is based on the **FCC Fabric**, a dataset of all locations that can receive broadband service
- The Portal displays each of these locations but **the actual address data is not downloadable** (instead, it only allows export of Location IDs)
- With the CostQuest Tier E Fabric License, you can **take a Location ID number from the Portal and pair it with the address** it is associated with
- Find out more on the [NTIA website](#) and register [here](#)
 - You will need an [FCC Registration Number](#) (FRN) to register

Tip: **Apply early** - it may take time for the application to be processed

How to submit a challenge

- 1. Log in to the Challenge Portal** – Users can log in using email/password combo or use a “Magic Link” which sends an email with a link to log-in directly without a password.
- 2. Select ‘Challenge’ Item in the Navigation Menu** – The display will show the Dashboard.

The screenshot displays the California Broadband Challenge Dashboard. On the left is a dark navigation menu for the California Public Utilities Commission, with a red arrow pointing to the 'Challenges' item. The main dashboard area features a title 'California Broadband Challenge Dashboard' and six metric cards: 'CHALLENGES SUBMITTED', 'REBUTTALS SUBMITTED', 'CHALLENGES PROCESSED', 'REBUTTALS PROCESSED', 'LOCATIONS ACCEPTED', and 'LOCATIONS REJECTED', all showing a count of 0. Below these cards are two buttons: 'Export Challenge Locations Data' and 'Export Challenge Data'.

How to submit a challenge

3. Select 'Add Challenge' from the Dashboard

Broadband Challenge Dashboard Invite Teammate Challenge Submission

The broadband challenge process is now open! Prepare your challenges and rebuttals to ensure your community can get the broadband they deserve.

The broadband challenge process is an essential step conducted prior to deploying BEAD funding. Participation in the challenge process helps ensure that the map data is accurate and is a key step in making sure that grant funding reaches communities in need.

How to submit a challenge

← Create a Challenge

1. Challenge Category > 2. Challenge Type > 3. Challenge Details > 4. Select Locations > 5. Evidence & Documentation > 6. Attestation

The screenshot displays the 'Create a Challenge' interface. On the left, a sidebar shows 'Layers' and 'Zones' with options to 'Create a zone' and 'Combine a zone', both highlighted with a red box. Below this, it shows '1 ZONES' and 'Empty Area'. The main area is a map with a search bar and a scale of 2000. On the right, the 'Select Challenge Category' panel is visible, with a red bracket indicating steps 4, 5, and 6. The panel includes four categories: 'Planned Or Existing Service', 'Enforceable Commitment', 'Provider Service Level', and 'Anchor Institution Classification'. A 'View Guidelines' link is also present. At the bottom, there are 'Cancel' and 'Next' buttons.

4. Select either 'Dashboard' or 'Challenge Map' – This is a view of the Challenge Map

5. Select 'Challenge Category'

6. Define a zone

How to submit a challenge

7. Define the zone boundaries by:

- a) drawing boundaries on the map
- b) uploading shapefiles
- c) selecting from the shapefile library

← Create a Challenge

1. Challenge Category > 2. Challenge Type > 3. Challenge Details > 4. Select Locations > 5. Evidence & Documentation > 6. Attestation

← Create zone

* Give the zone a name

Test Zone

Add a tag to the zone

Select or create tag(s)

Define the zone's boundaries by drawing a polygon on the map

Define zone boundaries

Choose a method

- Draw**
Draw any polygon on the map
- Create area by uploading shapefiles, or selecting from library of places**
Import or modify .kmz, .kml and .geojson files
- Select from library**
Select a city, county, tribal, or other shapefile

Search

Select Challenge Category

To begin the challenge process, please start by selecting the type of challenge you would like to submit.

Planned Or Existing Service

Report qualifying broadband service that has been or will be deployed by June 30, 2024 without an enforceable commitment.

Enforceable Commitment

Report qualifying broadband service deployed, or planned to be deployed, under a current or expanded enforceable commitment.

Provider Service Level

Report a provider's level of service for availability, speed, latency, data cap, technology and business service only.

Anchor Institution Classification

Identify whether a location is a Community Anchor Institution and has access to 1G symmetrical broadband service.

Looking for more in-depth guidance on each challenge type? Click to view the challenge type guidelines.

[View Guidelines](#)

← Cancel Next →

How to submit a challenge

8. You can add a location by selecting it and then **selecting 'Add to challenge'**

Add multiple locations by using Shift + Click + Drag or uploading an area you defined or a list of Fabric IDs

The screenshot displays the 'Create a Challenge' interface. At the top, a breadcrumb trail shows the current step: '4. Select Locations'. The main content is divided into three sections:

- Location Details:** A sidebar on the left containing:
 - ADDRESS:** 149 Pecan Bayou Dr, Alexandria, LA 71303
 - IDENTIFIERS:** Census Block GEOID (220790107012007) and Block Group GEOID (220790107012)
 - BUILDING TYPE:** Residential; **UNIT COUNT:** 1 unit
 - FUNDING PROGRAM:** No prior funding received
 - PROVIDERS:** AT&T (Served) and Starlink (Unserviced). AT&T details: Performance 1000 mbps, Service type Residential/Business. Starlink details: Performance 220 mbps, Service type Residential/Business.
- Map:** A dark-themed map showing a residential area with a light blue polygon highlighting a specific region. A red-bordered pop-up window is overlaid on the map, displaying the address '149 Pecan Bayou Dr, Alexandria, 71303' and a blue 'Add To Challenge' button.
- Right Sidebar:** Titled 'Select Locations for your Planned Service Challenge'. It includes instructions on how to add locations and two buttons: 'Select Or Upload The Area' and 'Upload List Of Locations'. Below these, it shows 'Selected Locations' (Remove all) and 'Total selected locations: 0'. At the bottom, there is a 'Download Locations Spreadsheet' button and 'Back'/'Next' navigation buttons.

How to submit a challenge

9. **Upload Evidence and Documentation** - Upload the required evidence for the challenge you're submitting. For challenges that may require you to provide separate evidence files per location, you will be prompted to download a .csv file with the selected locations.
10. **Attestation** – Confirm that, to the best of your knowledge and belief, the challenge is true, complete, and accurate.

How to view and submit individuals' submitted evidence

- You as a permissible challenger will be able to **view, evaluate, and submit evidence** from individuals **through the Portal**
- The process will involve the following steps:
 1. Select an individual's submitted evidence visible to you through the Portal
 2. View details of the challenge, including location and type of challenge
 3. Review the evidence attachments to evaluate that it substantiates the challenge
 4. Select to submit the evidence and it will automatically populate a challenge submission and be sent as a challenge

Rebut challenges

- Broadband service providers are the **only entities that can rebut challenges to their service**
 - **Example:** A challenge is submitted with evidence showing 30/5 Mbps service in an area that the FCC Map claims is 'served' (i.e., 100/20 Mbps or more). Only the broadband service provider that provides the relevant service can rebut, for example by providing a countervailing speed test from their internal network management system showing speeds of 100/20 Mbps or more.
- All **permissible challengers can rebut 'Planned service' and 'Enforceable commitment'** challenges and CAs may rebut challenges related to their service or status
- Once a challenge is rebutted, the CPUC will analyze the evidence submitted and issue a final determination at the end of the Challenge Process

How permissible challengers can engage with individuals

Joanne Hovis

President

CTC Technology and Energy

Engage with individuals on evidence submission

- Permissible challengers—especially local governments, Tribal governments, and nonprofits—are **encouraged to engage with individuals and review their evidence** for challenges
- Why choose to engage with individuals' evidence submissions?
 - Expand the amount of evidence you can draw upon for challenges
 - Empower members of the public to make a change to broadband data
 - Advocate for your community
- Permissible challengers can:
 - **Promote participation** in the Challenge Process to their community
 - **Collect evidence** from individual submitters through the Challenge Portal
 - **Submit evidence** on individuals' behalf as long as it meets evidentiary standards

Individuals in the Challenge Process

What they can do

- Upload evidence to make it available to permissible challengers through a publicly available site, including:
 - Speed tests
 - Availability evidence
 - Other evidence regarding provider service

What they can't do

- Submit a challenge to the CPUC
- Register in the Challenge Portal
- Rebut challenges
- View challenge status in real time

Community engagement

Permissible challengers may want to run significant community planning and mobilization to individual through **outreach campaigns** via:

- **Email**
- **Physical mail**
- **Phone calls**
- **Webinars**

The CPUC will provide outreach materials to permissible challengers in a toolkit

Community outreach campaigns

Campaigns by permissible challengers should offer community members with relevant information about the Challenge Process, such as:

- **How to conduct speed tests**
- **How to provide results to the entity submitting the challenge**

The CPUC will provide outreach materials to permissible challengers in a toolkit

What is in the toolkit for permissible challengers?

To conduct outreach to individuals during the Challenge Process, the CPUC will provide permissible challengers with:

- Customizable slides to conduct training sessions
- Video of training session for individuals
- A recording of this webinar
- Flyers and handouts in PDF format

Evidence required for individual challenges

Joanne Hovis

President

CTC Technology and Energy

Minimum level of evidence to submit a challenge

The challenge portal will verify whether a challenge meets certain requirements:

- **Address provided** for challenge is a **Broadband Serviceable Location** and can be **found in the Fabric** (dataset showing all locations where fixed broadband is or could be deployed)
- Challenged service is **on the National Broadband Map** and meets the definition of **reliable broadband service** (service accessible via fiber-optic technology, cable modem/hybrid fiber-coaxial technology, digital subscriber line (DSL) technology, or terrestrial fixed wireless technology with entirely licensed spectrum or a hybrid of licensed and unlicensed spectrum)
- **Email address** used to send challenge can be **verified and is reachable** (by sending confirmation message to email listed)
- If **scanned images** are used, the quality must be good enough to **allow for optical character recognition (conversion of image with text into a machine-readable text format)**

Common challenge types

Individuals may submit evidence for the following types of challenges:

- Availability
- Speed
- Latency
- Data cap
- Technology
- Business service only

The most common types for individuals are Availability and Speed

Important factors for permissible challengers to remember

- Review the **evidence** necessary for the challenge type
 - **Check that all required information is represented** in evidence, the median is correct for speed tests, the submitter subscribes to at least 100/20 Mbps for speed tests, and that each evidence attached is the right file for the challenge
 - Challenges with inaccurate or insufficient evidence will not be accepted
- Submit evidence **before the end of the Challenge Phase**
 - The 30-day Challenge Phase will require quick action
 - Early submission allows more time for communications with individual submitters to correct any errors

Note: specific evidentiary requirements for individuals are included in the customizable presentation for individuals

The CPUC is focused on transparency

The CPUC will post **all submitted challenges and rebuttals** before final challenge determinations are made including:

- **The unit of local or Tribal government, nonprofit or broadband service provider** that submitted the challenge
- The **census block group** containing the challenged broadband serviceable location(s)
- The **challenged party**
- The **type of challenge**
- A **summary of the challenge** (including if the challenged party submitted a rebuttal)

Note: CPUC will not post any personally identifiable information about individuals providing evidence

Takeaways

Laura Sasaki

Program and Project Supervisor

CPUC BEAD Branch

The bigger picture

- BEAD is a **once-in-a-generation investment** in the nation's broadband infrastructure
- **Success of BEAD hinges upon** the CPUC receiving the most updated, conclusive **data about broadband availability**
- **Your participation in the Challenge Process** will show the CPUC locations of potential concern
- May also help influence what **funding opportunities after BEAD** will look like and where potential future CPUC efforts should be directed

Upcoming webinars

Webinars are open to all who wish to attend, and registration links will be posted on the [BEAD Events](#) page.

DATE/TIME	TOPIC
May 23, 2024 10 -11:00a.m. PST	Office Hours
May 30, 2024 10 -11:00a.m. PST	Office Hours
June 6, 2024 10 -11:00a.m. PST	Office Hours
Date to be announced	Challenge Process for Broadband Service Providers

Next Steps

Ways to Prepare to Participate in the Challenge Process

- Attend a webinar and [register for office hours](#)
- [Pre-register to submit a challenge](#)

* Are you interested in submitting challenges on behalf of residents?

Yes

- Request a CostQuest License
 - [Tier D](#)
 - [Tier E](#)
- Sign up for email updates and news
- Conduct community outreach to promote public participation in the challenge process using the CPUC provided toolkit

Questions?

If you have questions about the Challenge Portal or need technical assistance, please email cahelpdesk@ready.net.
